SUBJECT INDEX¹

A. General

04. *Textbooks, Handbooks, and Geotechnical Periodicals*

- Engineering geology in Czechoslovakia. Leggett, R. F., 219.
Introduction to terrain-vehicle systems by M. G. Bekker. Meyerhof, G. G., 93.
Landslides and their control. Morgenstern, N., 222.
Muskeg engineering handbook. Rutka, A., 221.

B. Engineering Geology

00. *General*

- Engineering geology in Czechoslovakia. Leggett, R. F., 219.

02. *Groundwater*

- Geohydrology of the metropolitan Winnipeg area as related to groundwater supply and construction. Render, F. W., 243.
Groundwater flow in eastern Ottawa. Jarrett, P. M. and Eden, W. J., 326.
Hydrogeologic aspects of dewatering at Welland. Farvolden, R. N. and Nunan, J. P., 194.
Photo-interpretation studies in the location of prairie groundwater supplies. Mollard, J. D., 127.

03. *Mass Movements and Subsidence*

- Regional geology and landslides in the marine clay deposits of eastern Canada. La Rochelle, P., Chagnon, J. Y., and Lefebvre, G., 145.

04. *Natural Catastrophes (including earthquakes, floods)*

- Planning defences against avalanches. Schaerer, P. A., 397.

05. *Permafrost and Frozen Ground*

- Design and construction of dikes on permafrost foundations for the Kettle Generating Station in Manitoba. Macpherson, J. G., Watson, G. H., and Koropatnick, A., 356.
Dikes on permafrost: predicting thaw and settlement. Brown, W. G. and Johnston, G. H., 365.
Disturbances to the tundra and forest tundra environment of the western Arctic. Mackay, J. R., 420.

10. *Mineralogy and Petrology*

- Black shale heaving at Ottawa, Canada. Quigley, R. M. and Vogan, R. W., 106.
Black shale heaving at Ottawa, Canada: Discussion. Bérard, J., 113.
Black shale heaving at Ottawa, Canada: Discussion. Morgenstern, N. R., 114.
Investigation of heave in Billings shale by mineralogical and biogeochemical methods. Penner, E., Gillott, J. E., and Eden, W. J., 333.

C. Site Investigations

01. *Airphoto Surveys*

- Photo-interpretation studies in the location of prairie groundwater supplies. Mollard, J. D., 127.

05. *Boring Technique and Equipment and Recording of Results*

- Étude des sables submergés par échantillonnage non remaîné. Tavenas, F., Capelle, J. F., and La Rochelle, P., 37.

¹Based on the International Geotechnical Classification System (IGC) approved November 1969 by the International Society for Soil Mechanics and Foundation Engineering. Permission to use this classification system is gratefully acknowledged.

06. *Sampling, Handling of Samples*

Étude des sables submergés par échantillonnage non remanié. Tavenas, F., Capelle, J. F., and La Rochelle, P., 37.

07. *Measurement of Field Conditions (including groundwater, in situ stress)*

Geohydrology of the metropolitan Winnipeg area as related to groundwater supply and construction. Render, F. W., 243.

Groundwater flow in eastern Ottawa. Jarrett, P. M. and Eden, W. J., 326.

Hydrogeologic aspects of dewatering at Welland. Farvolden, R. N. and Nunan, J. P., 194.

09. *Reports on Site Investigation*

The engineering significance of Pleistocene stratigraphy in the Saskatoon area, Saskatchewan, Canada. MacDonald, A. B. and Sauer, E. K., 116.

D. Soil Properties: Laboratory and Field Determinations00. *General (including laboratory supplies)*

Étude des sables submergés par échantillonnage non remanié. Tavenas, F., Capelle, J. F., and La Rochelle, P., 37.

Soil grinding mill. Young, F. D., 339.

The engineering significance of Pleistocene stratigraphy in the Saskatoon area, Saskatchewan, Canada. MacDonald, A. B. and Sauer, E. K., 116.

02. *Physico-chemical Properties (including corrosion, thixotropy)*

Regional geology and landslides in the marine clay deposits of eastern Canada. La Rochelle, P., Chagnon, J. Y., and Lefebvre, G., 145.

03. *Composition, Structure, and Density (including porosity)*

Gradation and shear characteristics of four cohesionless soils. Skermer, N. A. and Hillis, S. F., 62.

Microstructural changes in soft quick clay at failure. Pusch, R., 1.

05. *Compressibility (including consolidation and swelling)*

Anisotropic consolidation of Leda clay. Mitchell, R. J. and Crawford, C. B., 92.

Effect of groundwater levels on stress history of the St. Clair clay till deposit. Soderman, L. G. and Kim, Y. D., 173.

Effect of groundwater levels on stress history of the St. Clair clay till deposit. Discussion. Adams, J. I., 190.

Effect of groundwater levels on stress history of the St. Clair clay till deposit. Discussion. Dreimanis, A., 188.

Some factors affecting compacted clay swelling. Yevnin, A. and Zaslavsky, D., 79.

06. *Shear-deformation and Strength Properties (including pore-water pressure)*

A finite element approach to elastic soil-structure interaction. Smith, I. M., 95.

Gradation and shear characteristics of four cohesionless soils. Skermer, N. A. and Hillis, S. F., 62.

On the yielding and mechanical strength of Leda clays. Mitchell, R. J., 297.

Safety factors and the probability distribution of soil strength. Lumb, P., 225.

Some observations on the undrained shearing strength used to analyze failure. Reply. DeLory, F. A. and Salvas, R. J., 345.

The mechanics of landslides in Leda clay. Eden, W. J. and Mitchell, R. J., 285.

The mechanics of landslides: Discussion. Jarrett, P. M.,

The mechanics of landslides in Leda clay: Discussion. Ladanyi, B., 506.

The pore pressure - strain relationships of normally consolidated undisturbed clays. Part 1. Theoretical considerations: Discussion. Ladanyi, B., 341.

08. *Thermal Properties (including freezing)*

Factors affecting the frost susceptibility characteristics of pulverized fuel ash. Sutherland, H. B. and Gaskin, P. N., 69.

Frost heaving forces in Leda clay. Penner, E., 8.

Transient temperature distribution in insulated pavements. Predictions vs. observations. Ho, D. M., Harr, M. E., and Leonards, G. A., 275.

E. Analysis of Soil-Engineering Problems00. *General*

The engineering significance of Pleistocene stratigraphy in the Saskatoon area, Saskatchewan, Canada. MacDonald, A. B. and Sauer, E. K., 116.

- Safety factors in soil mechanics. Meyerhof, G. G., 349.
01. *In Situ Stresses caused by Gravity and Applied Loads and Excavations*
 A finite element approach to elastic soil-structure interaction. Smith, I. M., 95.
 Gravitational stress field around a tunnel in soft ground. Hoyaux, B. and Ladanyi, B., 54.
 Gravitational stress field around a tunnel in soft ground: Discussion. Schmidt, B., 346.
 Gravitational stress field around a tunnel in soft clay. Reply. Hoyaux, B. and Ladanyi, B., 348.
02. *Deformation and Settlement Problems (including piles)*
 A finite element approach to elastic soil-structure interaction. Smith, I. M., 95.
 Dikes on permafrost: predicting thaw and settlement. Brown, W. G. and Johnston, G. H., 365.
 Effect of groundwater levels on stress history of the St. Clair clay till deposit. Soderman, L. G. and Kim, Y. D., 173.
 Effect of groundwater levels on stress history of the St. Clair clay till deposit: Discussion. Adams, J. I., 190.
 Effect of groundwater levels on stress history of the St. Clair clay till deposit: Discussion. Dreimanis, A., 188.
03. *Bearing Capacity of Soils*
 Settlement studies on air terminal building and apron, Vancouver International Airport. Meyerhof, G. G. and Sebastyan, G. Y., 433.
 Spread footings on "reinforced" soil. Kuzmanović, B. O. and Balla, A., 318.
04. *Bearing Capacity of Piles*
 A note on the pile load test interpretation. Peaker, K., 479.
 A note on pile load testing. Matich, M. A. J., 493.
 Load tests on bedrock. Seychuck, J. L., 464.
 Pile tests at Beech River. Selby, K. G., 470.
 Pulling capacity of concrete cast in situ bored piles. Sowa, V. A., 482.
05. *Earth Pressure Problems (including silos)*
 The behavior of tied-back retaining walls. Hanna, T. H. and Matallana, G. A., 372.
06. *Stability of Slopes, Cuts, and Excavations*
 Landslides and their control. Morgenstern, N., 222.
 Observations on some basal failures in sheeted excavations. Milligan, V. and Lo, K. Y., 136.
 Regional geology and landslides in the marine clay deposits of eastern Canada. La Rochelle, P., Chagnon, J. Y., and Lefebvre, G., 145.
 Riverbank stability at the University of Alberta, Edmonton. Thomson, S., 157.
 Riverbank stability study at the University of Alberta, Edmonton: Discussion. Brooker, E. W., 170.
 Riverbank stability study at the University of Alberta, Edmonton: Discussion. Iverson, N. L., 169.
 Some observations on the undrained shearing strength used to analyze a failure: Discussion. Brown, J. D., 343.
 Some observations on the undrained shearing strength used to analyze a failure: Reply. DeLory, F. A. and Salvas, R. J., 345.
 The mechanics of landslides in Leda clay. Eden, W. J. and Mitchell, R. J., 285.
 The mechanics of landslides in Leda clay: Discussion. Jarrett, P. M., 504.
 The mechanics of landslides in Leda clay: Discussion. Ladanyi, B., 506.
07. *Seepages and other Hydraulic Problems (including erosion)*
 Hydrogeologic aspects of dewatering at Welland. Farvolden, R. N. and Nunan, J. P., 194.
 Hydrogeologic aspects of dewatering at Welland: Discussion. Theoretical analysis of aquifer response due to dewatering at Welland: Discussion. Olpinski, K., 217.
 Observations on some basal failures in sheeted excavations. Milligan, V. and Lo, K. Y., 136.
 On the effectiveness of sand drains. Lindskog, G. and Broms, B. B., 508.
 Theoretical analysis of aquifer response due to dewatering at Welland. Frind, E. O., 205.
09. *Frost Action and Heat Transfer Problems (including erosion)*
 Frost heaving forces in Leda clay. Penner, E., 8.

11. *Soil-vehicle Interaction (trafficability)*

Introduction to terrain-vehicle systems by M. G. Bekker. Meyerhof, G. G., 93.

F. Rock Properties: Laboratory and Field Determinations

02. *Physico-chemical Properties (including weathering resistance)*

Black shale heaving at Ottawa, Canada. Quigley, R. M. and Vogan, R. W., 106.

Black shale heaving at Ottawa, Canada: Discussion. Bérard, J., 113.

Black shale heaving at Ottawa, Canada: Discussion. Morgenstern, N. R., 114.

Investigation of heave in Billings shale by mineralogical and biogeochemical methods. Penner, E., Gillott, J. E., and Eden, W. J., 333.

G. Analysis of Rock-Engineering Problems

03. *Bearing Capacity of Rock*

Load tests on bedrock. Seychuck, J. L., 464.

05. *Seepage Problems (including drainage)*

Geohydrology of the metropolitan Winnipeg area as related to groundwater supply and construction. Render, F. W., 243.

H. Design Construction and Behavior of Engineering Works

01. *Foundations of Structures (buildings, bridges, tanks, etc.)*

Geohydrology of the metropolitan Winnipeg area as related to groundwater supply and construction. Render, F. W., 243.

Settlement studies on air terminal building and apron, Vancouver International Airport. Meyerhof, G. G. and Sebastyan, G. Y., 433.

02. *Retaining Structures and Cutoff Walls*

Observations on some basal failures in sheeted excavations. Milligan, V. and Lo, K. Y., 136.

The behavior of tied-back retaining walls. Hanna, T. H. and Matallana, G. A., 372.

04. *Earthworks, Embankments, Fills, and Dams*

Design and construction of dikes on permafrost foundations for the Kettle Generating Station in Manitoba. Macpherson, J. G., Watson, G. H., and Koropatnik, A., 356.

Dikes on permafrost: predicting thaw and settlement. Brown, W. G. and Johnston, G. H., 365.

Outardes 4—Barrage principal. Dussault, R., Laroque, G. S., et Ouimet, J., 17.

Outardes 4—Barrage principal: Note d'omission. Dussault, R., Laroque, G. J., et Ouimet, J., 223.

05. *Underground Structures (including tunnels, conduits, and shafts)*

A tunnel roof failure in till. Matheson, D. S., 313.

Geohydrology of the metropolitan Winnipeg area as related to groundwater supply and construction. Render, F. W., 243.

06. *Base Courses and Pavements of Roads, Railroads, and Airfields*

Transient temperature distribution in insulated pavements. Predictions vs. observations. Ho, D. M., Harr, M. E., and Leonards, G. A., 275.

K. Construction Methods and Equipment including Improvement of Soil and Rock Conditions

01. *Compaction*

On the effectiveness of sand drains. Lindskog, G. and Broms, B. B., 508.

S. Snow and Ice Mechanics and Engineering

01. *Snow and Ice Cover*

Observations on break-up of river ice in north central Alberta. Nuttall, J. B., 457.

On contributory factors in avalanche hazard evaluation. Perla, R. I., 414.

Planning defences against avalanches. Schaerer, P. A., 397.

02. *Properties of Snow and Ice*

Process of failure in ice. Gold, L. W., 405.

03. *Snow and Ice Engineering*

Observations on break-up of river ice in north central Alberta. Nuttall, J. B., 457.

On contributory factors in avalanche hazard evaluation. Perla, R. I., 414.

Planning defences against avalanches. Schaerer, P. A., 397.

T. Related Disciplines**05. *Biosciences***

Black shale heaving at Ottawa, Canada. Quigley, R. M. and Vogan, R. W., 106.

Black shale heaving at Ottawa, Canada: Discussion. Bérard, J., 113.

Black shale heaving at Ottawa, Canada: Discussion. Morgenstern, N. R., 114.

Investigation of heave in Billings shale by mineralogical and biogeochemical methods.

Penner, E., Gillott, J. E., and Eden, W. J., 333.

ARTICLES:

G. G. Meyerhof	Safety factors in soil mechanics	349
J. G. Macpherson, G. H. Watson, and A. Koropatnick	Dikes on permafrost foundations in northern Manitoba	356
W. G. Brown and G. H. Johnston	Dikes on permafrost: predicting thaw and settlement	365
T. H. Hanna and G. A. Matallana	The behavior of tied-back retaining walls	372
P. A. Schaerer	Planning defences against avalanches	397
L. W. Gold	Process of failure in ice	405
R. I. Perla	On contributory factors in avalanche hazard evaluation	414
J. Ross Mackay	Disturbances to the tundra and forest tundra environment of the western Arctic	420
G. G. Meyerhof and G. Y. Sebastyan	Settlement studies on air terminal building and apron, Vancouver International Airport, British Columbia	433

TECHNICAL NOTES:

J. B. Nuttall	Observations on break-up of river ice in north central Alberta	457
J. L. Seychuk	Load tests on bedrock	464
K. G. Selby	Pile tests at Beech River	470
K. Peaker	A note on pile load test interpretation	479
V. A. Sowa	Pulling capacity of concrete cast <i>in situ</i> bored piles	482
M. A. J. Matich	A note on pile load testing	493

DISCUSSIONS:

P. M. Jarrett	The mechanics of landslides in Leda clay: Discussion	504
B. Ladanyi	The mechanics of landslides in Leda clay: Discussion	506
G. Lindskog and B. B. Broms	On the effectiveness of sand drains: Discussion	508
